POETRY.

The annexed beautiful and, as we happen to know, justly applied lines, are in truth what they purport to be an impromptu by a giften pen, suggested by a casual conversation. IMPROMPTU,

On a lady who is said to refrain habitually from all evil speaking

MIRACULOUS ESCAPE FROM IMMINENT PERILS.

A well a thenticated parrative like the following, of incidents that have actually occurred to the pareator, is calculated to extend our credulity to the most thrilling and horrible descriptions that are embodied in works of fiction. It will be remembered that the newspapers, a few months ore, co tained an account of an attack made by a part of Indians upon the lighthouse, on Cape Florida, in July, in which it was briefly stated that the lighthouse was burnt, and that the keeper had a very narrow escape from destruction in the conflagration. That person, Mr John W. B. Thompson, has lately published in the Charleston Courier a parrative of his perils, sufferings, and almost

"Medicine without principles is an humble Art, and a degrading occupation."

Dr Herbert having artived in America for the purpose of taking a tour through it, and seeing to every place he visited so many invalids laboring under a fferent complaints, and so many invalids laboring under a fferent complaints, and so many who have ruined their constitutions by applying to advertised nostrums, respectfully informs the citiz as that has returned to the city of Boston and intends remaining for the purpose of rendering his services to the afflicted.

Dr H may be consulted at his apartments, No 276 Washington st., a few doors West of Aven Place, from 10 in the mooning till 3 in the evening. The Doctor wishes every person who may need his advice, to make timely application.

The advantages the Dr has possessed of acquiring a knowledge of different diseases, have been far greater than generall, falls to the lot of any individual. From his peculiar mode of treatment, his professional celebrity has been established; and since his arrival in America, gratitude arising from a thousand hearts is and has been a sweet enjoyment.

Stationing the negro in a position to give him a sign if or the purpose of falls to the lot of any individual. From his peculiar mode of treatment, his professional celebrity has been established; said the moment the Indians rushed up to prevent him. Stationing the negro in a position to give him a sign if or the purpose of falls to the lot of any individual. From his peculiar mode of treatment, his professional celebrity has been established; since the arrival in America, gratitude arising from a thousand hearts is and has been a sweet enjoyment. Stationing the negro in a position to give him a sign of any attempt they might make to bresk in, he seized three muskets which were loaded with balls and buckshot, and ascended to the second floor to fire on the beseigers. Seeing a large party of them opposite his dwelling-house, he discharged his muskers among them in succession, to their great surprise and confusion. But they rallied with horrible yells, and poured foll vollies into the window at which Mr Thompson was standing, until it was totally demolished. He then fired at them from other windows, from the top of the lighthouse, and from every point in fact, from which he could obtain an Indian for his aim. The Indians, on their part, continued to pour in a heavy fire at every window, and into the very lantern; the tin tanks of oil for the light, containing two hundred and twenty-five gallons, were riddled with their balls, and the oil streaming forth, saturated Mr Thompson's bedding and clothing, and ran down the stairs, a fearful and a fitting agent in the conflagration that ensued.

The lower window was boarded up with yellow pine plank, and to this as well as to the door, the savages set fire. The flam's soon communicated to the stairs, and ascended rapidly. Mr Thompson, as yet unwounded, de-cended to carry up a keg of gunpowder, (fearful butthen!) and his bag of balls, to the upper part of the building; and having succeeded in this, proceeded to cut away the stairs about half way from the bottom. The events which ensued, are described with all the forcible simplicity of truth in the following passage of his narrative; and for depth of interest, is almost equal to that portion of the superlative novel of Ivanhoe, which describes a seene in the seige of

the castle of Front de Boenf. "I had difficulty in getting the old negro man up the space I had already cut, but the flames now drove me from my labor, and I retreated to the top of the house, over the scuttle that leads to the lantern, which kept the fire from me for some time : at last the awful moment arrived, the cracking flames burst around me, the savages PRESERVATIVE—for Carriages and thaise tops—Harnesses—Thorough Braces—Boots and Shees—Forge Bellows—Eugine Hose—Factory Bands—and Leather exposed to the action of heat or wet. By this time I had received some wounds myself; and finding no chance for my life, for I was roasting alive, I took the determination to jump off. I got up, went outside the iron railing, recomme ided my soul to God, and was on the point of going head foremost on the rocks below, when something dictated to me to return and lay down again; I did so and in two minutes the fire fell to the bottom of the house."

The old negro bay dead, pierced with balls in many places, and Mr Thompson had received three rifle balls in each of his feet, besides being dreadfully burnt, or to use his own words "literally roasted." He was therefore compelled to remain lying in his perilous position upon the top of the narrow wall which had remained after the ex-

"The Indians thinking me dead, left the lighthouse, and set fire to the dwelling house, kitchen and other out houses, and began to carry their plunder to the beach; A hand Clothing; consisting of all varieties, viz: Surton's, loaks, Vests. Dress Coats, Pants, Bosoms, Collars, Stocks, and in fact every thing that would act as a vessel to hold any thing; my provisions were in the light house, except a barrel of flour which they took off. The next morning they hauled out of the light-house by means of a pole, the tin that composed the oil tanks, no do bt to make grates with which to manufacture county root into what we call arrow root. After loading my little sloop, about ten or twelve went into her; the rest took to the beach to meet at the other end of the island. This happened, as I judge about 10, A. M. My eyes being much affected, prevented me from knowing their actual force, but I judge there were from forty to fifty, perhaps more-1 was now almost as bad off as before; a burning fever was on me, my feet shot to pieces, no clothes to cover me, nothing to eat or drink, a hot sun over head, a dead man by my side, no friend near, or any to expect, and placed between seventy and eighty feet from the earth, and no chance of getting down, my situation was truly herrible; about 12 o'c ock I thought I could perceive a vessel not far off; I took a piece of the old negro's trows rs that had escaped the flames by being wet with blood and made a signal.

For several hours did he remain in the agony of "hope deferred," ere he perceived that his signal had been noticed; but some time in the afternoon I saw two boats wi h my sloop in tow coming to the landing. I had no doubt but they were Indians, having seen my signal, and had returned to finish their murderous design; but it proved to be boats of the United States schooner Motto, Captain Armstrong, with a detachment of seamen and marines, under the command of Lieutenant Lloyd, of the sloop of war Concord. They had retaken my sloop after the Indians had stripped her of her sails and rigging, and every thing of consequence belonging to her .- They informed me they heard my explosion twelve miles off, and ran down to my assistance, but did not expect to find me alive. Those gentlemen did all in their power to relieve me, but, night coming on, they returned on board the Motto, after assur

ing me of their assistance in the morning. And thus passed and closed upon a brave American citizen, the 4th of July! Little did his fellow citizens, re NEW LAMPS.—Just received by the Denmark, 10 joicing throughout our happy union, imagine that a heart casks of Lamps, comprising a good assortment of As-

their muskets made fast to a ram rod, which I received, and hauled up a tail block and made fast round an iron stancheon, rove the twine through the block, and they below by that means rove a two inch rope, and hoisted up two men who soon landed me on terra firma. I must state here that the Indians had made a ladder by lashing pieces of word across the lightning rod, near forty feet from the ground, as if to have my scalp, nolens volens. This happened on the 4th. After I got on board the Motto, every man, from the Captain to the cook, tried to alleviate my sufferings. On the 7th I was received in the Military Hospital, through the politeness of Lieut. Al-yord, of the 4th Regiment of United States Infantry; he has done every thing to make my situation as comfortable as possible.

Such is the close of this remarkable and affecting narrative. Before Mr Thompson left Key West, he had all the balls, except one, extracted from his feet and legs, and he is now able to walk without the aid of a cane. Is it not within the power, as it is apparently the duty of the government, to bestow a pension on this brave and suffering public servant ?-N. Y. Era.

WANT OF CREDIT.

The whig papers are constantly railing about the scarci. ty of money; when it is notorious that there is nearly three times the quantity of money now in circulation to meet the payment of balances due from man to man, and bank to bank, and city to city, that there was in the country prior to the panic of '33 and '34. The metallic basis of our credit currency is increased from thirty millions (the extent it reached prior to the panic) to eighty millions

But the amount of capital invested in the business of banking since the panic, is two hundred millions of dollars. Supposing that a bank most make eight per cent, on their apital in order to divide six per cent., and pay its expenses, and divide losses, every man can see that, in consemence of the investment of this enormous sum in banking. SIXTEEN MILLIONS OF DOLLARS premium must be reaped by the new banks alone. And how was this two bundred millions capital invested in order to reap such a harvest? In notes of hand and other negociable evidences of debt. The cr ation of this banking capital, then, made a demand for two hundred millions worth of notes of hand, drafts, etc. This gave an impulse to private credit. The banks wanted private debts, in some hape or other, to effect investments of their capital and to get returns from such investments. This has caused overtrading in land and other unavailable property.

The miscalled scarcity of money is merely a scarcity of saleable and available property, and a want of credit. The capital and credit of the country has been stretched to its utmost limit, and is now pledged to the carrying through of projects such as men in sane minds would never look at, f they were not very ignorant. If people exhaust all their capital, and all their credit, in investments in unavailable property, or in loans to speculators in such property, the unavoidable consequence is a demand for still more credit to sustain the parties interested until they can get returns

from their investments. Those who blame bank directors for their own want of skill and prudence, instead of blaming the banking system, do not, in our view, show much practical knowledge. is true that the banks in some parts of the Union, are not able to relieve the wants of these merchants, traders, manufacturers, &c. who are perfectly solvent and need credit only for a short period to pay their debts and retain a large surplus of property. By lending their funds and credit to capitalists or traders who lent again to land speculators, a large mass of capital is pledged where no returns can be expected for years to come. The prudent merchant, manufacturer, farmer and mechanic, who are not only solvent, but in possession of heavy amounts of property (and good property) must now pay the same rates for current credit to cover interest and guarantee, as the wild speculat-

or, who is perhaps insolvent, or possesses property that is of no immediate use to any body; because not required by the present wants of any one. The bestand most solid customers of banks are outbid by gamblers in unavaliable property. The banks ar not to blame. The same capital and credit would be employed in the same way, whether they lent to this man or that man. After the capital and credit leaves the control of the bank, it is invested imprudently. The banks have no control over the matter.

There can be no re ief until speculators in unavailable property, who have no capital, are crowded out of the money market, either by their failure, or by a sale of their property to men who, having capital, can invest and hold on to their investments. The high rates of interest and guarantee (for what is usually called interest, is under a eredit system of currency, guarrantee and interest together) will effect this very soon. The rooner such men fail, or sell their property to capitalists, the better for those in active business. But if these investments are really prudent then those in active business must fail, or sell out, and take to different employments.

That there is no scarcity of money, is evident from the fact, that foreign Exchange remains favorable, and there is no demand for coin for export. Our foreign balances do not trouble us. It is the domestic balances which cause all the distress; and the balances from man to man, bank to bank, and city to city, cannot be met without sacrifice, until the spirit of speculation, generated by our banking system, is crushed and silenced by a revulsion.

All that money-i. e. specie-is wanted for, is to meet balances. The scarcity of money is to be measured by the state of foreign Exchanges; and the scarcity of credit by the state of interest. So long as a credit currency is forced down people's throats by special laws and governmeut patronage, so long will the demand for money and the demand for credit be confounded by Bank directors. When they make discounts, they cannot judge, whether their supply of credit currency goes, or will go, to satisfy a demand for money, or a demand for credit. Strip the Banks of the patronage, advantages, and privileges, which our State Legislatures heap upon them, as if to defy the natural laws of value, and all will go on well. But usury laws must also be abolished and speculation will be nip-

That we shall be compelled to wade through much trouble, is what we have for a year past expected. It remains to be seen, whether our merchants will cry out " give, give," and succeed in their demands; or whether the people will refuse to see the currency deranged-property unsettled-and industry, misdirected by a wretched Banking system, which the merchants themselves suffer

serests. If they like this gambling, let them go on crying down an honest and sharp-sighted administration. But when the immutable laws of trade decree that they shall settle their balances, and see who really owns the property, about which there has been so much scrambling, they must not murmur if they find that they are among those, who have stripped their coats from their backs, in the turmoil and bustle.

They are queer people in Methuen. It is but a few days since Major Marland was dangerously wounded in a sham figh , at a general training there-supposed to have been done intentionally-and the last Gazette from that town contains the following:-

" Mysterious Circumstance .- On Monday night last, about half past 8 o'clock, an explosion took place directly in front of the Congregational meeting house, where the choir of singers were at the time assembled for the purpose of singing. It proved to be an old and rusty gun barrel, which was split into several pieces—one of which, about 4 inches in length, passed directly through the front window and lodged in the room of the house occupied by Capt. Charles Currier. Providentially no one at the time was in the room. Had any one been sitting by the window at the time, the result would have been fatal.

The gun was placed at the fence, by the side of the road evidently pointing to the Meeting house. It was supposed to have been fired by means of a slow match. An individual was passing towards the meeting house, very near, at the time of the explosion, who im aediately proceeded to the spot but saw no one. By whom it was placed there, is not yet known. Be this as it may, there can hardly be a doubt that it was done with a view to mischief, if not to

A letter dated London, Oct. 22, published in the Journal of Commerce, says that the directors of the British and American Steam Navigation Company have contracted for the building of the largest, and intended to be the most splendid steam ship ever built, expressly for the New York and London trade. She will measure 1900 tons; between perpendicular, 235; 220 feet keel, 40 feet beam. Three decks, and every thing else in proportion. She will carry two engines of 225 horse power each, 761 inch cylinder, and 9 feet stroke.

Dr. Lieber has arrived in New York with his family, after escaping from a perilous shipwreck on the coast of North Carolina. The vessel in which he had embarked from Porto Rico was run down by a strange ship and left in a disabled and crippled state; and for twelve days exposed to a tempestuous sea in a protracted struggle against winds and waves.

Tremont Theatre -The public expectation is much excited about Mr Barry's new piece, and we apprehend that it will not be much disappointed. No effort or expense has been spared to produce a magnificent spectacle, of which a general idea may be formed by reading the advertisement in another column.

The Lion Theatre will bring out the "War Wolf of Hindostan" to-night. It is the production of William Barrymore, Esq., and had an immense run in London. The elephant and other animals, which are to be in the piece, arrived last night.

National Theatre, New York .- Mr Hackett, the comedian, and Mr Moran, the merchant, have purchased this establishment in conjunction, for the sum of \$75,000. Mr. Flynn's lease has nine months to run, and he intends, it is raid, to convert it into a magnificent Circus, the admission charges to the boxes of which will be fifty cents, and the pit a quarter of a dollar.

Later from Spain .- By the Express Mail .- By an arrival at Baltimore from Malaga, we have received intelligence from Spain to 23d ult. The Carlists under Gomez had retreated to the mountains, (as we stated yesterday,) and the Queen's troops, were advancing in three divisions The Captain General of Grenada had arrived at Malaga with 500 cavalry, and order was completely restored.

Late from Mexico .- Advices from the city of Mexico have been received at New Orleans, to the 15th of October. A division of the army for Texas had left that city, with sappers and miners, and a company of pioneers. The baggage, and another division would set out in a few days.— Much exasperation of feeling against the American residents existed in the capital, and outrages were apprehend-

The Texian army is reported to have marched upon Matamoras, but this is only rumor, as yet. It appears to have been believed at Tampico, for troops had been despatched in all haste from that port to Matamoras. The Texian farce was described as consisting of 3000 men, under Gen. Rusk, and at the latest advices to have advanced within twenty leagues of Matamoras, and marching rapidly.

Texas.-As was expected President Burnet has resigned, and Gen. Houston has been appointed president pro. tem. This movement is supposed to diminish the probabilities of General Santa Anna's liberation.

The following rather remarkable intelligence we copy from the New York Courier and Enquirer, in which it appears as correspondence from New Orleans, under date of Nov. 8. We do not find it in the New Orleans papers of

that or the next day. Schooner Congress, from Velasco, Texas, 29th October, in ballast, brought papers to the 28th. Santa Anna and Almonte had been relieved of their irons. A treaty was negociating between the former and the Cabinet, the object of which, according to the best information, is to establish the federal system of Government in Mexico, with the acknowledgement of the independence of Texas. Sama Anna has promised to effect this remarkable change through the medium of some of his proteges and well tried adherents, who are yet in command in Mexico, and who no doubt will obey his orders and directions. But he himse f shall not recover his liberty until the treaty has received its full execution. There is no doubt that the Texas war will ultimately be terminated by one of these agreements, and then a new era will begin in that republis.

MARRIED. In this city by Rev Mr. Streeter, Mr. Christian Wubbenhorst to Miss Esther R Witham

In this city, on Thursday last, Mr. James L. Wheeler, aged

In recording the death of this amiable young man, the pen of friendship may be pardoned, if it pauses to trace a slight tribute of respect to his memory. In all the transactions of life, he proved himself a young man of unimpeachable and exemplary character; in the retirement of the parental roof, or the social hearth he manufactured in the retirement of the parental roof, or the social hearth, he was ever found the duiful son and the fast friend. In the active scenes of business, he ever evinced that integrity of purpose which commands the respect of our mercantile commu-nity;—amid innocent festivity, he ever displayed the cheerful spirit, tempered with moderation, which is the offspring of a pure conscience;—in his domestic relations, duty, affection, and kindness, kept alive that pure flame, which should ever have on the domestic alive. In these social honds of friendship burn on the domestic altar;—in those social bonds of friendship and brotherly intercourse, which constitute the great charm of youthful existence, he was unobtrusive but constant, not too

asily won into confidence, nor easily shaken into distrust.

While a large circle of friends mourn his early departure as that of a brother; - while bereaved parents bend under the discipline of divine wisdom — still the reflections, derived from a recurrence to his character and principles, add fresh energy and gratification to their consoling reliance on the promises of a

NEW ENGLAND CROWN GLASS.—The New England Crown Glass Company have recently erected a new turnace and are manufacturing an excellent article. Their Crown Glass is thick, pure and of excellent color. Its thickness gives it an advantage over all thin glass, which is liable to crack from contraction in cold weather. Its surface not being polished after being blown, retains its enamel, briffiancy and hardness, and is not liable to the objection which applies to Plate Glass, of being easily and permanently bedimmed by

any other Glass, is preferable for Stores, as it does not tinge the rays of light as they pass through it, and therefore white goods particularly appear to advantage; and it is peculiarly useful for Factories, as some minutes of light may be gained morning and evening, in consequence of the absence of color in this glass. The price of second quality is reduced from the

rates heretofore asked. Those who wish to contract for this Glass are requested to specify New England Crown Glass. As much imposition has been practised by dealers in Glass, by deceptive marks on boxes and other artifices, any purchaser who may apprehend in the best manner, and warranted—with 28 feet Suction Hose, well ornamented, brass pipe &c.

N account of that most excel ent Medicine prepared at Dr Loveman's Gilead flouse. Price 50 cents per bottle. Sold by appointment in Boston, at D. S. RO & L vND'S, 188

" To administer to a mind diseased, pluck from the Memory arooted Serrow, "Raze out the written troubles of the Brain, and with some

sweet oblivious An'idote,
"Cleanse the foul Bosom of that peritous stuff which weighs
upon the Heart."
Dr. LOVEMAN'S Bulm of Gilead is universally acknowledged to be peculiarly efficacious in all inward wastings, loss of appetite, indigestion, depression of spirits, trembling or shaking of the bands or limbs, shortness of breath, and consumptive habits. It thins the blood, eases the most violent pain in the hear and stomach, and promotes gentle perspiration. By the Medical Faculty this medicine is much admired being pleasant to the taste and smeil, gently astringing the fi-

good diges to requires.

Dr Loveman's Balm of Gilead is recommended to the weak, the relaxed, and debilitated, as an agreeable and speedy restorative; and considered as a cordial, is essential to the comfort of ladies of fashion, being a preventive against cold, when then before going out to parties, balls, roots or the play. It will enliven the spirits and invigorate the mind and body, and if taken after fatigue, it will with a few hours sleep, take way all la guor consequent on broken rest, and give relief

bres of the stomach, and giving that proper tensity which a

om every unpleasant sensation. from every unpleasant sensation.

It is a most valuable remedy for such diseases as are attended with the following symptoms, namely—a great straitness of the breast, with difficulty of breathing—violent palpitations of the heart, sudden finees of heat in various parts of the brdy—at other times a sense of cold, as if water was poured on them—flying pains in the arms and limbs, back and belly resembling those occasioned by the gravel—the pulse. belly, resembling those occasioned by the gravel—the pulse very variable, sometimes uncommonly slow, at other times very quick—vawning the h cough, frequent sighing, and a sense of suff cation, as from a ball or lump in the throat—alternate fits of crying and convulsive laughing—the sleep unsound, and seldom refreshing and the patient often trobled with horrid dreams. Much has been said by interested individuals against Medicines that a endvertised, but there is a very important observation to be made respecting Drioveman's Balm of Gilead, that unless its operation was gentle d efficacious, it could not have obtained the unexampled demand it has acquired
NIRVOUS DEBILITY.

Without Health we can enjoy no Fortune; Honors, Riches, and all other advontages are useless."

This Co dial has been uncommonly successful with young people who have the apprarance and air of old age, who are pale, effectinate, benumbed, stupid, and even imbecile; whose bodies are become bent, whose legs are no longer able to carry them, who have an utter distaste for every thing, and are totally incapacitated. Where the stomach is frequently dis-ordered, the body is weakened; paleness, bodily decay and emaciation succeed, and the eyes sink into the head. The virtues of Dr Loveman's Balm of Gileadere demonstrated, in eradicating the worst and most dangerous symptoms of nervous debility, and nothing has tended so much to establish the fame of this medicine, as its certain success in those complaints which strike their roots so deep in the constitution, and are so fatal to the happiness of mankind.

Dr Loveman's Balm of Gilead has risen in repute with eve-

ry triat of its efficacy. Some, perhaps, unacquainted with its virtues, not having perused the Guide to Heslin, may be induced to ask what is the Balm of Gilead good for? What complaint doth it cure ?- To answer this it will b necessary to

"Hold the Mirror up to Nature." Let those who are afflicted in the following manner reflect on the cause that produced such havor upon the "wholesone appetites and powers of life:"-disordered stomach, dry cough, weakness in the voice hoarseness, shortness of breath upon the least exercise, and relaxation of the whole system. Those afflicted with paleness, languor of the eyes, weakness of sight or memory, should take time to consider linewas's advice, that "youth is the important period for forming a robust construction," and that "nothing is to be dreaded so much as premature excess." The foundation of a happy old age is a good constitut on in youth; temperance and moderatio.. at that age are passports to hagpy grey hairs.

For such as have violated these precepts, then, this healing balm is suitable—complaints included in the vague appella tion of Nervous and Consumptive, are those for which it is

In offering this medicine to the public, I can say with confidence that they will find great benefit by using it in all diseases recommend d, as I m fully acquainted with the medical qualities, as they have been discovered by myself, and are extracted from vegetables, and I can truly say, there is no earthly danger in using the medicine by any person, no matter how they may be afflicted. This medicine has been used by a large number of persons, and have been cured of diseases of a long standing, when all other medicines have failed. n23

THE TRUTH WILL PREVAIL. CERTAIN DISEASES (UREO.

Dr. Goodwill's Gonorrhaa and Gleet Detergent. and Gleets is now become too well known and established, in all parts of the Union, to require comment. Its universal success, which in no instance has ever failed, has warranted it to cure in forty-eight hours the most desperate and inflammatory cases of Gonorike, Gletts, and whites in all their stages, strictures, Seminal Weaknesses, pains in the loins, irritation of the Uretue a from Gravel, as well as chronic affections of the urinary bladder and kidneys, if ever so viois an agreeable liquid, and its effects long on the constitution, (being composed of Sarsaparilla and the choicest of preparations) that while it restores the system, its superiority over every other kind of medicine only requires a limited trial to know its efficacy. Every person that has made use of this medicine has been his own physician, and secrecy has been secured—having proved effectual in almost two thousand cases, and never to our knowledge failed in any instance. The vast and increasing sale from the recommendations of the highest medical characters, as well as those who have experienced its salubrious and beneficial offects, prove its great success and entire superiority over every other medicine, in bethe above diseases, giving—muscular strength, energy and vigorous health to the whole frame. The most delicate females may take it with perfect safety Dr Goodwill's Detergent is t safe, certain and speedy cure for the above diseases, from the most recent to the most protracted cases. It is taken without any risk, inconvenience, or suspension from business. See that your case is eradicated, not patched up by quack doctors or quack medicines. Those who make use of one single bottle may be convinced of the easy method of being cared. The "motto" of this medicine, "let every person be their own physician with secrecy." It will prevent the occur ence of the disease in persons, male or temale, of the most festidious delicacy, and is a real blessing to human kind. It ought always to be on hand.

N. B. A word to the wise .- Take no medicine but the above, and keep away from the quack Doctors, whose names appear in every public print, and then you take no mercury and save your constitution.

"We have much pleasure in bearing testimony to this safe and efficacious Medicine: we do this on grounds of strict im-partiality, knowing several friends who have been cured by it.

A fact that we know.

THE REMEDY IS IN YOUR OWN HANDS-Dr Palmer's Dimon Pearl Tooth Powder and Brushes is offer d as a remedy whose effects are as certain as they are delightful.— This excellent tooth powder is not the invention of the present day. It has not been confined to modern times, and Dr Palmer has had the happiness of restoring, in its purity, the long lost article which was in such vogue in the days of yore. It is offered with the tullest confidence as to its merits, to which thousands who have used it can be till and to the solution. which thousands who have used it can testify, and should any lady or gentleman who, by misfortune, have been afflic ed with noisome breath or bad teeth, make one trial of its virtues, and not feel perfectly satisfied of its efficacy, then "Othello's occupation's gone."

The Diman Pearl Tooth Powder and Brushes is no modern quackery. It requires no puffing, no paragraphing, to render it uses as general as its effects are delightful. The ingredientare of a nature which cannot injure, and must beautify the teeth and sweeten the breath. R B'ISTOW, Author and Teacher of the Anti-Angular System of Writing, being on the point of leaving this city, and feeling grateful to the public for the extensive patronage with which he has been uniformly favored, finds it his

duty thus publicly to make his sincere acknowledgements.

It would be a work of supererogation on the present of rapid hand, or to urge in favor of his plan the short period required, and the perfect ease with which his pupils have possessed themselves of this highly useful accomplishment. Yes he cannot omit expressing his thanks to them for the clear discrimination of its merits, and the strict attention to his instructions, which have so much lightened his labors, while they have added to the pleasure of his duties and ensured the success of his system.

Appealing, therefore, with great confidence, to those he has had the bonor to instruct, for the sincerity and truth with which he now addresses the public, he begs leave to inform them, that in less than twelve months from this date, it is his intention to return to Foston, and resume has profession, re-lying upon the future for the extension toward ham of that generous feeling and good taste, which it h s been his happy fortune a ways to have experienced in the past.
